TATTOO & PIERCING CO

For most piercings including navel, nipple and surface piercings, ears, facial and dermal piercings the best products to use is **Saline Solution/Rock salt & Boiled water**. These can be purchased from any pharmacy or chemist or supermarkets & convenience shops.

-Ensure you have cleaned your hands using antibacterial soap before cleaning any piercing.

-Use Solution directly onto a cotton bud and clean gently but thoroughly around the area of the piercing.

With navel, nipple, surface and micro-dermal piercings

-Avoid baths and stick to showers for the first couple of weeks, allowing the hot water to rinse carefully over the piercing

-Wear loose clothing to avoid any irritation of the piercing

-Avoid swimming and exercise for the first two weeks, clean piercing after either of these activities

-If any products such as moisturiser, shower soaps&gels or fake tan are used, carefully avoid the area of the piercing and clean it straight after use

-Dermal piercings must be covered by a plaster for at least two weeks, change this once/twice a day and clean the piercing each time

With all ear and facial piercings

-Avoid using any products such as hair spray/hair dye/make-up/moisturiser directly onto any piercing, if you use anything, clean the area immediately with Saline solution

-Do not touch or play with your piercing

With tongue, tongue web, smiley and lip piercings

-The most essential product to use to clean these piercings is **Alcohol Free Listerine mouthwash**, rinse your mouth with this 2 to 3 times a day.

-Avoid smoking as this will prolong the healing process of your piercing, if you smoke you must rinse your mouth every third cigarette.

-Try to keep your tongue relaxed (for tongue&tongue web piercing) do not play with it in your mouth or stick it in and out to show people, as this will encourage swelling

-Ibuprofen & Nurofen are advisable as they are anti-inflammatory and will help with pain and swelling

-Try to eat as best as you can, you will find it uncomfortable but take eating slowly and carefully

Most piercings are pierced with a longer bar to allow for swelling, you will have been advised to come back after a certain amount of time to have a smaller bar fitted. This is recommended to help finish the healing of your piercing and is generally much more comfortable. Bar changes cost £5 and we will change them for you!

Remember that everybody heals differently and you must be consistent with your aftercare and patient through out the healing process.
